Basic Tacton CPQ

ACADEMY-TACTONCPQ-101

This course aims to give an overview of Tacton CPQ as well as explaining administration. The course discusses the different actors in Tacton CPQ and illustrates their different responsibilities. All the main workflows and objects are explained, which means that this course covers the basics of Tacton CPQ. This also makes the course a prerequisite for the other CPQ courses.

The course consists of a mix of both theoretical parts as well as practical hands-on exercises.

TYPICAL STUDENT
Any person who will administer or set up Tacton CPQ Project managers, sales people and others wishing to gain a more detailed understanding of Tacton CPQ Modelers, Price Managers and Document Managers who will work with Tacton CPQ.
