Product Modeling Upskill

Recalibrate your Modeling knowledge and update your skills

ACADEMY-PROMO-UPSKILL-101

Are you making the most out of the latest Product Modeling features and enhancements?
This course aims to give a rundown of key enhancements and new features released in Tacton Product Modeling during the last 6 months.
The focus will be on the main enhancements and features that have been released and will contain a mix of both theoretical parts as well as practical hands-on exercises.

TYPICAL STUDENT
Any person that has taken one or several Tacton CPQ courses and wants to stay up to date with their skills in the product and get more knowledge around the latest features.
